ENERGY POLICY

Index to Volume 23

Energy Policy is an international journal published by Elsevier Science Ltd.

Publishing, Editorial, and Reprint Offices: Elsevier Science Limited, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, UK. Telephone: +44 (0)1865 843000. Facsimile: +44 (0)1865 843010.

Production Offices: **For general enquiries**, Catherine Morgan at Elsevier Science. **For enquiries on articles accepted for publication and proofs**: Paradigm Publishing Services, at Rashleigh, 2 Chapel Close, Leafield, Oxfordshire OX8 5NS, UK. Telephone: +44 (0) 1993 878704. Facsimile +44 (0) 1993 878419, or Lydbrook Farmhouse, West Hanney, Oxfordshire OX12 0LW, UK. Telephone: +44 (0) 1235 868243; Facsimile: +44 (0)1235 868906 or by Email: Paradigm@Lydbrook.demon.co.uk.

Address for submissions: Nicky France. Address may be found inside front cover.

Subscription enquiries and orders from customers in North America should be sent to: Elsevier Science Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, USA and from the Rest of the World to: Elsevier Science Ltd, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, UK. Subscription rates for Japan are available on request.

Annual subscription (12 issues, calendar year): £460; $732. **Single copies:** £17.00; $ 27.00. Prices include cost of postage and packing. Copies sent to subscribers in Australasia, Bangladesh, Canada, India, Japan, Pakistan, Sri Lanka and USA are airspeeded for faster delivery at no extra cost. Airmail prices are available on request. Payment must be made with order.

US Postmaster: Send address corrections to *Energy Policy*, c/o Mercury Airfreight International Ltd, Inc., 2323 Randolph Avenue, Avenel, NJ 07001, USA.

Second class postage paid at Rahway, NJ, USA.

Back issues: Current and 1995 volumes are available from Elsevier Science Offices, at the address above.

Advertising enquiries should be made to Mark Butler, MTB Advertising, 11 Harts Gardens, Guildford GU2 6QA, UK. Telephone: +44 (0)1483 578507. Facsimile: +44 (0)1483 572678.

Microfilm: A microfilm version of *Energy Policy* is available from University Microfilms Inc., 300 N Zeeb Road, Ann Arbor, MI 48106-1346, USA.

This journal and the individual contributions in it are protected by the copyright of Elsevier Science Ltd, and the following terms and conditions apply to their use. **Photocopying:** Single photocopies of single articles may be made for personal use as allowed by national copyright laws. Permission of the publisher and payment of a fee is required for all other photocopying, including multiple or systematic copying, copying for advertising or promotional purposes, resale, and all forms of document delivery. Special rates are available for educational institutions that wish to make photocopies for non-profit educational classroom use. In the USA, users may clear permissions and make payment through the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923, USA. In the UK, users may clear permissions and make payment through the Copyright Licensing Agency Rapid Clearance Service (CLARCS), 90 Tottenham Court Road, London W1P 9HE, UK. In other countries where a local copyright clearance centre exists, please contact it for information on required permissions and payments. **Derivative Works:** Subscribers may reproduce tables of contents or prepare lists of articles including abstracts for internal circulation within their institutions. Permission of the publisher is required for resale or distribution outside the institution. Permission of the author is required for all other derivative works, including compilations and translations. **Electronic Storage:** Permission of the publisher is required to store electronically any material contained in this journal, including any article or part of an article. Contact the publisher at the address indicated.

Except as outlined above, no part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, mechanical, recording or otherwise, without prior written permission of the publisher.

Energy Policy 0301-4215/96/$15.00.

No page charges are levied by this journal.

Registered Office: Elsevier Science Limited, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, UK.

A member of the Reed Elsevier plc group

This journal is printed on acid free, low chlorine bleach, wood free paper.
Typeset by Paradigm Publishing Services, West Hanney and Leafield, Oxfordshire, UK.
Printed by Cambridge University Press, Cambridge, UK.

ENERGY POLICY

Index to Volume 23

January, February, March, April/May, June, July, August, September, October, November, December

Articles – titles

Coal

Coal policy and climate protection: can the tough German CO_2 reduction target be met by 2005? *Wilfrid Bach* 23:1, 85–91

A comment on 'Elimination of West European coal subsidies: implications for coal production and coal imports' by Marian Radetzki *Lidia Gawlik and Wojciech Suwala* 23:6, 519–521

A comment on 'The political economy of coal subsidies in Europe' by Kym Anderson *Ewa Rabinowicz* 23:6, 497–498

A comment on 'Reform of coal policies in Western and Central Europe: implications for the environment' by Ronald P Steenblik and Panos Coroyannakis *Torleif Haugland* 23:6, 555–556

A comment on 'Removing coal subsidies: implications for European electricity markets' by David M Newbery *Karl-Axel Edin* 23:6, 535

A comment on 'The world price of coal' by A Denny Ellerman *David Humphreys* 23:6, 507–508

Concluding comment: implications for Sweden *Claës Lindroth* 23:6, 559–560

Concluding comment: what prospects for coal subsidies? *Dieter Schmitt* 23:6, 557

Contrasting British policies for coal and nuclear power, 1979–92 *Mike Parker and John Surrey* 23:9, 821–850

Elimination of West European coal subsidies: implications for coal production and coal imports *Marian Radetzki* 23:6, 509–518

Editor's introduction to 'Coal in Europe: implications of dismantled subsidies' *Marian Radetzki* 23:6, 481–482

The impact of oil company investment on the world coal industry: overcapacity and price destabilization 1973–92 *Richard Koerner, Ian Rutledge and Philip Wright* 23:8, 659–667

A note on the concept of 'subsidy' *Ronald P Steenblik* 23:6, 482–484

The political economy of coal subsidies in Europe *Kym Anderson* 23:6, 485–496

Reform of coal policies in Western and Central Europe: implications for the environment *Ronald P Steenblik and Panos Coroyannakis* 23:6, 537–553

Removing coal subsidies: implications for European electricity markets *David M Newbery* 23:6, 523–533

The world price of coal *A Denny Ellerman* 23:6, 499–506

Electricity

Becoming proactive about environmental risks: regulatory reform and risk management in the US electricity sector *Clinton J Andrews and Shivani Govil* 23:10, 885–892

The BOT option: conflicts and compromises *A K David and P N Fernando* 23:8, 669–675

Change in China's power sector *Binsheng Li and James P Dorian* 23:7, 619–626

Dark after Chernobyl? Closing former Soviet power reactors *Michael J Scott, Jeffery E Dagle, Krista L Gaustad, Marylynn Placet, Joseph M Roop, Lawrence A Schienbein and Carlos A Ulibarri* 23:8, 703–717

Feast and famine: the case of Zambia's power sector *V Ranganathan and Abel C Mbewe* 23:12, 1093–1096

Federal tax effects on the financial attractiveness of renewable versus conventional power plants *Lawrence J Hill and Stanton W Hadley* 23:7, 593–597

Financial structure in the Indian power sector *Jamie Carstairs and David Ehrhardt* 23:11, 981–990

Financing energy projects: experience of the International Finance Corporation *Gary Bond and Laurence Carter* 23:11, 967–975

Financing the energy sector in developing countries: context and overview *Joy Dunkerley* 23:11, 929–939

Financing of private power development and power sector reform in emerging nations: an essential nexus? *Reinier Lock* 23:11, 955–965

Forecasting electric energy consumption using neural networks *S S A K Javeed Nizami and Ahmed Z Al-Garni* 23:12, 1097–1104

Global warming potentials: the case of emissions from dams *Luiz Pinguelli Rosa and Roberto Schaeffer* 23:2, 149–158

Handle with care: a primer on incentive regulation *Johannes P Pfeifenberger and William B Tye* 23:9, 769–779

New directions in electric power financing *Karl G Jechoutek and Ranjit Lamech* 23:11, 941–953

Oscillating currents: the changing rationale for government intervention in the electricity industry *Mark Jaccard* 23:7, 579–592

Product and process innovation in the energy industry: the development of integrated tar gasification combined cycle plants (ITGCC) *Francesco Gulli* 23:8, 647–658

Removing coal subsidies: implications for European electricity markets *David M Newbery* 23:6, 523–533

The view from the Overseas Private Investment Corporation (OPIC): support to power projects in Asia *Harvey Himberg* 23:11, 977–980

Energy and the environment

Becoming proactive about environmental risks: regulatory reform and risk management in the US electricity sector *Clinton J Andrews and Shivani Govil* 23:10, 885–892

Biomass energy in North American policies *Donald L Klass* 23:12, 1035–1048

Carbon coalitions: the cost and effectiveness of energy agreements to alter trajectories of atmospheric carbon dioxide emissions *J Edmonds, M Wise and D W Barns* 23:4/5, 309–335

Coal policy and climate protection: can the tough German CO_2 reduction target be met by 2005? *Wilfrid Bach* 23:1, 85–91

A cost–benefit analysis of slowing climate change *D Maddison* 23:4/5, 337–346

Discounting in integrated assessments of climate change *F L Toth* 23:4/5, 403–409

The economics of changing course: implications of adaptability and inertia for optimal climate policy *M Grubb, T Chapuis and M H Duong* 23:4/5, 417–432

The economics of stabilizing atmospheric CO_2 concentrations *R Richels and J Edmonds* 23:4/5, 373–378

Editors' introduction to 'Integrated assessment of mitigation, impacts and adaptation to climate change' *N Nakićenović, W D Nordhaus, R Richels and F L Toth* 23:4/5, 251–252

Energy and environment policy integration: the case of energy conservation policies and technologies in Japan *Yukiko Fukasaku* 23:12, 1063–1076

Environmental issues and the nuclear industry *Pamela Castle* 23:2, 139–147

A fiscal reform for increasing employment and mitigating CO_2 emissions in Europe *Francis Bossier and Thierry Bréchet* 23:9, 789–798

From Rio to Beijing: engendering the energy debate *Elizabeth W Cecelski* 23:6, 561–575

The ghosts of climates past and the specters of climate change future *W D Nordhaus* 23:4/5, 269–282

Global warming potentials: the case of emissions from dams *Luiz Pinguelli Rosa and Roberto Schaeffer* 23:2, 149–158

Greenhouse gas models and abatement costs for developing nations: a critical assessment *P R Shukla* 23:8, 677–687

An integrated framework to address climate change (ESCAPE) and further developments of the global and regional climate modules (MAGICC) *M Hulme, S C B Raper and T M L Wigley* 23:4/5, 347–355
Integrated assessment and environmental policy making: in pursuit of usefulness *E A Parson* 23:4/5, 433–445
Integrated assessment models of climate change: an incomplete overview *H Dowlatabadi* 23:4/5, 289–296
Intergenerational discounting *T C Schelling* 23:4/5, 391–394
Intergenerational equity, discounting, and the role of cost–benefit analysis in evaluating global climate policy *R C Lind* 23:4/5, 379–389
International CO_2 emissions control: an analysis using CETA *S C Peck and T J Teisberg* 23:4/5, 297–308
Introduction to 'Financing the energy sector in developing countries' *Joy Dunkerley and David Jhirad* 23:11, 927
Joint implementation and cost-effectiveness under the Framework Convention on Climate Change *Tim Jackson* 23:2, 117–138
Joint implementation and uniform mixing *Roebyem J Heintz and Richard S J Tol* 23:10, 911–917
Looking back 10 years *W A Nierenberg* 23:4/5, 283–288
MERGE: a model for evaluating regional and global effects of GHG reduction policies *Alan Manne, Robert Mendelsohn and Richard Richels* 23:1, 17–34
Mitigating global warming by substituting technology for energy, MITI's efforts and new approach *C Watanabe* 23:4/5, 417–431
No-regret potentials and technical innovation: a viability approach to integrated assessment of climate policies *J-C Hourcade and T Chapuis* 23:4/5, 411–416
Practice and progress in integrated assessments of climate change: a workshop overview *F L Toth* 23:4/5, 253–267
The rate of time preference: implications for the greenhouse debate *A S Manne* 23:4/5, 391–394
Reform of coal policies in Western and Central Europe: implications for the environment *Ronald P Steenblik and Panos Coroyannakis* 23:6, 537–553
Regulatory policies under uncertainty, value of information and greenhouse gas emissions *Hans W Gottinger* 23:1, 51–56
The relative role of trace gas emissions in greenhouse abatement policies *Milind Kandlikar* 23:10, 879–883
Scenario analysis of global warming using the Asian Pacific Integrated Model (AIM) *Y Matsuoka, M Kainuma and T Morita* 23:4/5, 357–371
Technical progress and climate change *J H Ausubel* 23:4/5, 395–401
Towards integrated energy and materials policies? A case study on CO_2 reduction in the Netherlands *D J Gielen* 23:12, 1049–1062
Towards a sustainable energy future *N G Ketting* 23:7, 637–638

Energy conservation and efficiency

Can renewable energy sources sustain affluent society? *F E Trainer* 23:12, 1009–1026
Do consumers discount the future correctly? A market-based valuation of residential fuel switching *Shimon Awerbuch and William Deehan* 23:1, 57–69
The economic impact of subsidy phase out in oil exporting developing countries: a case study of Algeria, Iran and Nigeria *F Birol, A V Aleagha and R Ferroukhi* 23:3, 209–215
Energy conservation in China: an international perspective *Zhong Xiang Zhang* 23:2, 159–166
Energy demand and efficiency in Estonia: structure, potential and policies *Eric Martinot, Lee Schipper and Marta Khrushch* 23:3, 217–233
Energy and environment policy integration: the case of energy conservation policies and technologies in Japan *Yukiko Fukasaku* 23:12, 1063–1076
Energy use for transport in Italy: past trends *Romeo Danielis* 23:9, 799–807
Technical efficiency, production functions and conservation supply *Carl Blumstein and Steven E Stofi* 23:9, 765–768
Towards a sustainable energy future *N G Ketting* 23:7, 637–638

Energy modelling

A cost–benefit analysis of slowing climate change *D Maddison* 23:4/5, 337- 346
Editors' introduction to 'Integrated assessment of mitigation, impacts and adaptation to climate change' *N Nakićenović, W D Nordhaus, R Richels and F L Toth* 23:4/5, 252–252
An integrated framework to address climate change (ESCAPE) and further developments of the global and regional climate modules (MAGICC) *M Hulme, S C B Raper and T M L Wigley* 23:4/5, 347–355
A cost–benefit analysis of slowing climate change *D Maddison* 23:4/5, 337- 346
Discounting in integrated assessments of climate change *F L Toth* 23:4/5, 403–4092
The economics of stabilizing atmospheric CO_2 concentrations *R Richels and J Edmonds* 23:4/5, 373–378
Forecasting electric energy consumption using neural networks *S S A K Javeed Nizami and Ahmed Z Al-Garni* 23:12, 1097–1104
Greenhouse gas models and abatement costs for developing nations: a critical assessment *P R Shukla* 23:8, 677–687
Integrated assessment and environmental policy making: in pursuit of usefulness *E A Parson* 23:4/5, 433–445
Integrated assessment models of climate change: an incomplete overview *H Dowlatabadi* 23:4/5, 289–296
International CO_2 emissions control: an analysis using CETA *S C Peck and T J Teisberg* 23:4/5, 297–308
Looking back 10 years *W A Nierenberg* 23:4/5, 283–2881
MERGE: a model for evaluating regional and global effects of GHG reduction policies *Alan Manne, Robert Mendelsohn and Richard Richels* 23:1, 17–34
PRA in the nuclear sector: quantifying human error and human malice *Anthony G Heyes* 23:12, 1027–1034
Practice and progress in integrated assessments of climate change: a workshop overview *F L Toth* 23:4/5, 253–267
Regulatory policies under uncertainty, value of information and greenhouse gas emissions *Hans W Gottinger* 23:1, 51–56
Scenario analysis of global warming using the Asian Pacific Integrated Model (AIM) *Y Matsuoka, M Kainuma and T Morita* 23:4/5, 357–371
Towards integrated energy and materials policies? A case study on CO_2 reduction in the Netherlands *D J Gielen* 23:12, 1049–1062

Energy policy and analysis

Carbon coalitions: the cost and effectiveness of energy agreements to alter trajectories of atmospheric carbon dioxide emissions *J Edmonds, M Wise and D W Barns* 23:4/5, 309–335
China's oil policy and its impact *Haijiang Wang* 23:7, 627–635
Contrasting British politics for coal and nuclear power, 1979–92 *Mike Parker and John Surrey* 23:9, 821–850
A cost–benefit analysis analysis of slowing climate change *D Maddison* 23:4/5, 337–346
Discounting in integrated assessments of climate change *F L Toth* 23:4/5, 403–4092enefit analysis of slowing climate change *D Maddison* 23:4/5, 337- 346
The economics of changing course: implications of adaptability and inertia for optimal climate policy *M Grubb, T Chapuis and M H Duong* 23:4/5, 417–432
Energy development in China: national policies and regional strategies *Kang Wu and Binsheng Li* 23:2, 167–178
European energy: balancing markets and policy *Bikash Mittra, Nigel Lucas and Ian Fells* 23:9 689–701
Federal tax effects on the financial attractiveness of renewable versus conventional power plants *Lawrence J Hill and Stanton W Hadley* 23:7, 593–597
A fiscal reform for increasing employment and mitigating CO_2 emissions in Europe *Francis Bossier and Thierry Bréchet* 23:9, 789–798
From Rio to Beijing: engendering the energy debate *Elizabeth W Cecelski* 23:6, 561–575
Gender issues in energy policy *Jyoti K Parikh* 23:9, 745–754
Handle with care: a primer on incentive regulation *Johannes P Pfeifenberger and William B Tye* 23:9, 769–779
Intergenerational equity, discounting, and the role of cost–benefit analysis in evaluating global climate policy *R C Lind* 23:4/5, 379–389
Integrated assessment and environmental policy making: in pursuit of usefulness *E A Parson* 23:4/5, 433–445
Integrated assessment models of climate change: an incomplete overview *H Dowlatabadi* 23:4/5, 289–296
Joint implementation and uniform mixing *Roebyem J Heintz and Richard S J Tol* 23:10, 911–917
The natural gas industry and interest rates: FERC Order 636 *Yong J Yoon* 23:9, 781–787
No-regret potentials and technical innovation: a viability approach to integrated assessment of climate policies *J-C Hourcade and T Chapuis* 23:4/5, 411–416
Oscillating currents: the changing rationale for government intervention in the electricity industry *Mark Jaccard* 23:7, 579–592
Practice and progress in integrated assessments of climate change: a workshop overview *F L Toth* 23:4/5, 253–267
Protectionist oil policies: a dynamic comparison for the USA *Carol Dahl and Mine K Yücel* 23:7, 599–605

The rate of time preference: implications for the greenhouse debate *A S Manne* 23:4/5, 391–394
Reform of coal policies in Western and Central Europe: implications for the environment *Ronald P Steenblik and Panos Coroyannakis* 23:6, 537–553
The relative role of trace gas emissions in greenhouse abatement policies *Milind Kandlikar* 23:10, 879–883
The renewables NFFO: a review *Catherine Mitchell* 23:12, 1077–1091

Energy security and world trade

The changing structure of the international oil industry: implications for OPEC *Kathleen L Abdalla* 23:10, 871–877
China's oil policy and its impact *Haijiang Wang* 23:7, 627–635
The competitive environment for oil and gas financing *Michael E Humphries* 23:11, 991–1000
The equilibrium price range of oil: economics, politics and uncertainty in the formation of oil prices *Pierre-Noël Giraud* 23:1, 35–49
The impact of oil company investment on the world coal industry: overcapacity and price destabilization 1973–92 *Richard Koerner, Ian Rutledge and Philip Wright* 23:8, 659–667
The world price of coal *A Denny Ellerman* 23:6, 499–506

Energy supply and demand

Cost savings and activity levels in the UKCS: a positive sum game *Alexander G Kemp and Bruce MacDonald* 23:1, 71–83
The determination of oil prices 1945–95: a diagrammatic interpretation *Paul Stevens* 23:10, 861–870
The direct and indirect energy requirements of households in the Netherlands *Kees Vringer and Kornelis Blok* 23:10, 893–910
Elimination of West European coal subsidies: implications for coal production and coal imports *Marian Radetzki* 23:6, 509–518
Energy demand and efficiency in Estonia: structure, potential and policies *Eric Martinot, Lee Schipper and Marta Khrushch* 23:3, 217–233
Forecasting electric energy consumption using neural networks *S S A K Javeed Nizami and Ahmed Z Al-Garni* 23:12, 1097–1104
The impact of oil company investment on the world coal industry: overcapacity and price destabilization (1973–92 *Richard Koerner, Ian Rutledge and Philip Wright* 23:8, 659–667
Natural gas pricing policy: the case of the Greek energy market *Y Caloghirou, A Mourelatos and L Papayannakis* 23:3, 183–194
Prospects for OPEC capacity *M A Adelman* 23:3, 235–241
The world price of coal *A Denny Ellerman* 23:6, 499–506

Energy technology

Change in China's power sector *Binsheng Li and James P Dorian* 23:7, 619–626
Economic analysis of flat plate collectors of solar energy *Ismail H Ozsabuncuoglu* 23:9, 755–763
The economics of changing course: implications of adaptability and inertia for optimal climate policy *M Grubb, T Chapuis and M H Duong* 23:4/5, 417–432
Mitigating global warming by substituting technology for energy, MITI's efforts and new approach *C Watanabe* 23:4/5, 417–431
No-regret potentials and technical innovation: a viability approach to integrated assessment of climate policies *J-C Hourcade and T Chapuis* 23:4/5, 411–416
Product and process innovation in the energy industry: the development of integrated tar gasification combined cycle plants (ITGCC) *Francesco Gulli* 23:8, 647–658
Technical efficiency, production functions and conservation supply *Carl Blumstein and Steven E Stofi* 23:9, 765–768
Technical progress and climate change *J H Ausubel* 23:4/5, 395–401

LDCs

The BOT option: conflicts and compromises *A K David and P N Fernando* 23:8, 669–675
The competitive environment for oil and gas financing *Michael E Humphries* 23:11, 991–1000
Feast and famine: the case of Zambia's power sector *V Ranganathan and Abel C Mbewe* 23:12, 1093–1096
Financial structure in the Indian power sector *Jamie Carstairs and David Ehrhardt* 23:11, 981–990
Financing energy projects: experience of the International Finance Corporation *Gary Bond and Laurence Carter* 23:11, 967–975
Financing the energy sector in developing countries: context and overview *Joy Dunkerley* 23:11, 929–939
Financing of private power development and power sector reform in emerging nations: an essential nexus? *Reinier Lock* 23:11, 955–965
Greenhouse gas models and abatement costs for developing nations: a critical assessment *P R Shukla* 23:8, 677–687
Joint implementation and cost-effectiveness under the Framework Convention on Climate Change *Tim Jackson* 23:2, 117–138
New directions in electric power financing *Karl G Jechoutek and Ranjit Lamech* 23:11, 941–953
New light – and heat – on forests as energy reserves *Christopher L Shaw* 23:7, 607–617
Oil and gas financing by the World Bank *Hossein Razavi* 23:11, 1001–1007
Photovoltaic, wind and diesel: a cost comparative study of water pumping options in Jordan *M Hammad* 23:8, 723–726
The view from the Overseas Private Investment Corporation (OPIC): support to power projects in Asia *Harvey Himberg* 23:11, 977–980

National and regional energy profiles and government policy

Biomass energy in North American policies *Donald L Klass* 23:12, 1035–1048
Change in China's power sector *Binsheng Li and James P Dorian* 23:7, 619–626
China's oil policy and its impact *Haijiang Wang* 23:7, 627–635
Coal policy and climate protection: can the tough German CO_2 reduction target be met by 2005? *Wilfrid Bach* 23:1, 85–91
Contrasting British politics for coal and nuclear power, 1979–92 *Mike Parker and John Surrey* 23:9, 821–850
Dark after Chernobyl? Closing former Soviet power reactors *Michael J Scott, Jeffery E Dagle, Krista L Gaustad, Marylynn Placet, Joseph M Roop, Lawrence A Schienbein and Carlos A Ulibarri* 23:8, 703–717
The direct and indirect energy requirements of households in the Netherlands *Kees Vringer and Kornelis Blok* 23:10, 893–910
The economic impact of subsidy phase out in oil exporting developing countries: a case study of Algeria, Iran and Nigeria *F Birol, A V Aleagha and R Ferroukhi* 23:3, 209–215
Elimination of West European coal subsidies: implications for coal production and coal imports *Marian Radetzki* 23:6, 509–518
Energy conservation in China: an international perspective *Zhong Xiang Zhang* 23:2, 159–166
Energy demand and efficiency in Estonia: structure, potential and policies *Eric Martinot, Lee Schipper and Marta Khrushch* 23:3, 217–233
Energy development in China: national policies and regional strategies *Kang Wu and Binsheng Li* 23:2, 167–178
Energy and environment policy integration: the case of energy conservation policies and technologies in Japan *Yukiko Fukasaku* 23:12, 1063–1076
Energy use for transport in Italy: past trends *Romeo Danielis* 23:9, 799–807
European energy: balancing markets and policy *Bikash Mittra, Nigel Lucas and Ian Fells* 23:8, 689–701
Financial structure in the Indian power sector *Jamie Carstairs and David Ehrhardt* 23:11, 981–990
A fiscal reform for increasing employment and mitigating CO_2 emissions in Europe *Francis Bossier and Thierry Bréchet* 23:9, 789–798
Mitigating global warming by substituting technology for energy, MITI's efforts and new approach *C Watanabe* 23:4/5, 417–431
Natural gas pricing policy: the case of the Greek energy market *Y Caloghirou, A Mourelatos and L Papayannakis* 23:3, 183–194
Nuclear energy in Lithuania: present status and hopes for the future *Jurgis Vilemas* 23:8, 719–722
Photovoltaic, wind and diesel: a cost comparative study of water pumping options in Jordan *M Hammad* 23:8, 723–726
The political economy of coal subsidies in Europe *Kym Anderson* 23:6, 485–496
Protectionist oil policies: a dynamic comparison for the USA *Carol Dahl and Mine K Yücel* 23:7, 599–605
Reform of coal policies in Western and Central Europe: implications for the environment *Ronald P Steenblik and Panos Coroyannakis* 23:6, 537–553
Removing coal subsidies: implications for European electricity markets *David M Newbery* 23:6, 523–533
The reorganization of the Russian hydrocarbons industry: an overview *Catherine Locatelli* 23:9, 809–819
Towards integrated energy and materials policies? A case study on CO_2 reduction in the Netherlands *D J Gielen* 23:12, 1049–1062

Nuclear power

Contrasting British politics for coal and nuclear power, 1979–92 *Mike Parker and John Surrey* 23:9, 821–850

Dark after Chernobyl? Closing former Soviet power reactors *Michael J Scott, Jeffery E Dagle, Krista L Gaustad, Marylynn Placet, Joseph M Roop, Lawrence A Schienbein and Carlos A Ulibarri* 23:8, 703–717
Environmental issues and the nuclear industry *Pamela Castle* 23:2, 139–147
Nuclear energy in Lithuania: present status and hopes for the future *Jurgis Vilemas* 23:8, 719–722
PRA in the nuclear sector: quantifying human error and human malice *Anthony G Heyes* 23:12, 1027–1034
Proliferation and the nuclear disarmament process *Thomas B Cochran* 23:3, 195–207
The renewables NFFO: a review *Catherine Mitchell* 23:12, 1077–1091

Oil and gas

The changing structure of the international oil industry: implications for OPEC *Kathleen L Abdalla* 23:10, 871–877
China's oil policy and its impact *Haijiang Wang* 23:7, 627–635
The competitive environment for oil and gas financing *Michael E Humphries* 23:11, 991–1000
Contrasting British politics for coal and nuclear power, 1979–92 *Mike Parker and John Surrey* 23:9, 821–850
Cost savings and activity levels in the UKCS: a positive sum game *Alexander G Kemp and Bruce MacDonald* 23:1, 71–83
The determination of oil prices 1945–95: a diagrammatic interpretation *Paul Stevens* 23:10, 861–870
The economic impact of subsidy phase out in oil exporting developing countries: a case study of Algeria, Iran and Nigeria *F Birol, A V Aleagha and R Ferroukhi* 23:3, 209–215
The equilibrium price range of oil: economics, politics and uncertainty in the formation of oil prices *Pierre-Noël Giraud* 23:1, 35–49
Financing the energy sector in developing countries: context and overview *Joy Dunkerley* 23:11, 929–939
The impact of oil company investment on the world coal industry: overcapacity and price destabilization 1973–92 *Richard Koerner, Ian Rutledge and Philip Wright* 23:8, 659–667
The natural gas industry and interest rates: FERC Order 636 *Yong J Yoon* 23:9, 781–787
Natural gas pricing policy: the case of the Greek energy market *Y Caloghirou, A Mourelatos and L Papayannakis* 23:3, 183–194
Oil and gas financing by the World Bank *Hossein Razavi* 23:11, 1001–1007
Product and process innovation in the energy industry: the development of integrated tar gasification combined cycle plants (ITGCC) *Francesco Gulli* 23:8, 647–658
Prospects for OPEC capacity *M A Adelman* 23:3, 235–241
Protectionist oil policies: a dynamic comparison for the USA *Carol Dahl and Mine K Yücel* 23:7, 599–605
The reorganization of the Russian hydrocarbons industry: an overview *Catherine Locatelli* 23:9, 809–819

Renewables

Biomass energy in North American policies *Donald L Klass* 23:12, 1035–1048
Can renewable energy sources sustain affluent society? *F E Trainer* 23:12, 1009–1026
Economic analysis of flat plate collectors of solar energy *Ismail H Ozsabuncuoglu* 23:9, 755–763
Federal tax effects on the financial attractiveness of renewable versus conventional power plants *Lawrence J Hill and Stanton W Hadley* 23:7, 593–597
New light – and heat – on forests as energy reserves *Christopher L Shaw* 23:7, 607–617
The renewables NFFO: a review *Catherine Mitchell* 23:12, 1077–1091

Utility regulation

Becoming proactive about environmental risks: regulatory reform and risk management in the US electricity sector *Clinton J Andrews and Shivani Govil* 23:10, 885–892
Handle with care: a primer on incentive regulation *Johannes P Pfeifenberger and William B Tye* 23:9, 769–779
